DECLARATION ON THE REACH REGULATION

Dear Sir or Madam,

The European chemicals legislation, EC Regulation No. 1907/2006 (REACH), came into force throughout the EU on June 01, 2007. The last amendment was made by European Chemicals Agency and is valid from June 14, 2023. This regulation defines the obligations and requirements for manufacturers, importers and downstream users of substances on their own, in preparations and in articles.

As a manufacturer of electronic parts and components (articles) we are a downstream user according to the REACH regulation. Our articles are not defined as substances or preparations (according to REACH regulation, article, and definition) No substances are released from our articles. Substances are neither manufactured nor imported. Therefore there is no obligation for us to register substances.

According to the information from our suppliers, the materials we use do not contain any substances from the SVHC candidate list (https://echa.europa.eu/de/candidate-list-table in the current version) or the maximum permissible limits are complied with. It is agreed with our suppliers that only REACH and RoHS compliant products will be delivered to us. If the conformity is not met, our suppliers are obliged to inform us immediately.

As soon as we find out that our products are subject to notification according to article 33 of the REACH regulation, we will inform them without being asked. Micro-Hybrid Electronic GmbH assures to follow the update of the REACH regulation and to compare it with the available substance information.

Yours sincerely,

Hermsdorf, October 23rd, 2023
